

## **Question & Answer**

### **Q. What are your core values and beliefs?**

**Ans:** I believe that by working together we can do better things. I am interested in collaborating with others and learning from them. I am always looking for new and innovative ways to solve problems and do things. I believe that creativity is important and I am always trying to come up with new ideas. I am committed to providing quality work and I am always trying to improve myself.

### **Q. What are your goals and aspirations?**

**Ans:** Goals and Aspirations as a Web Developer Mastering specific technologies: Choose in-demand frameworks or libraries (e.g., React, Node.js) and become an expert in their application. Explore new technologies and trends: Stay ahead of the curve by learning emerging technologies like WebAssembly, AR/VR, and blockchain. Network with other developers: Attend conferences, meetups, and online communities to connect and learn from others.

Use your skills for good: Develop web applications that address social issues like education, healthcare, and environmental sustainability.

Promote ethical and responsible web development: Advocate for fair and inclusive practices in the web development industry.

Maintain a growth mindset: Continuously learn and update your skills to stay relevant and adaptable. Find your passion within web development: Discover what you truly enjoy about the field and focus your efforts accordingly. Maintain a healthy work-life balance: Avoid burnout and prioritise your well-being for long-term success

### **Q. What are the first steps you will take to build your personal brand?**

**Ans:** My Goals and Aspirations as a Front-End Developer

Stay updated with the latest trends and technologies in front-end development. Explore new frameworks and libraries to expand my skillset and tackle complex challenges. Deepen my understanding of accessibility, performance optimization, and best practices.

Create intuitive, user-friendly, and visually appealing interfaces that enhance user experience. Develop innovative solutions that address real-world problems and improve people's lives. Contribute to projects that have a positive social impact and make a difference in the world.

Refine my coding skills to write clean, efficient, and maintainable code. Become an

expert in debugging and problem-solving complex front-end issues. Build strong collaboration skills to work effectively with designers, back-end developers, and other stakeholders.

**Q.How does personal branding differ from self-promotion, and why is this distinction important?**

**Ans:**Personal branding is a long-term strategy for building our reputation and influence.

Self-promotion is a short-term tactic for getting attention and attracting opportunities.

By focusing on building a strong personal brand, you can achieve long-term success and establish yourself as a trusted leader in your field.

**Q.What are you most proud of?**

**Ans:** I feel most proud of as a Muslim because Islam is the most peaceful religion.
